Priced Back  
Cushion  
System*

Recommendations for Appropriate Seating Selection Based on Individual Patient/Medical Needs: <sup>1</sup>

Average adult size with normal sensation, little or no skeletal deformity.

## COMFORT, PRESSURE REDUCTION AND LOW COST

The cMed Model BK 1200 offers a combination of technologies resulting in a cost-effective basic back cushion system that molds itself to the user's individual shape, providing excellent weight distribution while maintaining firm, non-collapsing support.

High-tech *shape-memory*<sup>™</sup> polymers are combined with low-weight resilient foams to provide seating comfort and long-term comfort. Low-density materials and an all-way-stretch cover minimize heat retention and shear

## MODEL BK 1200 FEATURES:

- Basic back support for manual and other wheelchairs.
- Self-contouring *shape memory* materials to provide soft cushioning yet resist bottoming out
- Uniform support
- Incontinence resistant, washable all-way stretch polyester cover for moisture protection
- Low-profile design for greater stability
- Minimal weight for improved mobility
